

ASIENSETECH

## About Us

## Organizational Structure

### AsienseTech - The Name of Software Revolution

At AsienseTech, we redefine the software development system. Our intention is to provide smart, simple, advanced and strategic software solutions. Quality-Development is our main priority. By transforming ideas into solutions, we solve problems related to any company's digital presence.

AsienseTech is a unique software development company formed by a joint venture between Workspace Infotech Limited and Merchant Private Limited. Consequently, we always make sure our technology systems have extensive coverage.

One of Singapore's top software development companies is AsienseTech. Through a 15 years long journey, we grew to become one of the best software development companies on the market. Besides, we uphold the level of perfection and never deviate from the aim of excellence.

Our greatest assets are our team of talented software developers, support engineers, and digital marketers.

# Our Services

## Web Development

From the complex development process of a web app architecture to the general creative aspect like ideating a solution for a target problem, Asienstech takes care of them all for our clients. If you need a comprehensive and elegant web development service, go no further.

## Web Design

As a leading web design company, we use the most popular methodology to create a website for companies worldwide. When a business wants to draw the attention of customers over the internet, a perfect web design is a must.

## Software Development

We specialize in providing end-to-end, high quality, product design solutions, encompassing all aspects of the project. We are passionate about what we do, ensuring we deliver you the very best results.

## Graphics Design

We have an efficient design process and allocate new design requests at a shortest period of time. The speed at which we work depends upon the complexity of your design requests and the number of requests you send us.

## ERP & Digital Core

No matter what your industry or business size are, our real-time ERP software can help connect your people, devices, and networks - and create a digital core for implementing new technologies. With enterprise resource planning (ERP) systems from Workspace, you can run fast.

## Hosting Solution

Our cloud server, dedicated solely to your purpose with uncontented resources and the high availability and redundancy that our enterprise-grade cloud hosting platform provides.

## HR & People Engagement

HR & People engagement, it's a part of HRIS, (Human Resource Information System) a software or solution for the data entry, data tracking, and data information needs of the Human Resources, payroll, management, and accounting functions within a business.

## UI & UX Design

The UI and UX Design help to win the consumers' confidence and make them use your application or website providing them what they are looking for. The number of consumers you are getting on your website/application can measure the success of the great UI and UX.
